

INTERNET: BUSINESS

HIGH-SPEED INTERNET

Few businesses can operate without Internet access today, but if you're still settling for dial-up access you're missing half the Internet. Maybe more!

With Business TruVista, you and your staff can take full advantage of the Internet's colossal worldwide library of information, interactive tools, streaming video, and a host of other business enhancing technologies.

Customers are a very big reason you need to have Internet access, because they expect it. Many potential customers prefer to surf before they shop. Let's face it you probably do the same. A Business TruVista connection lets you keep tabs on your competition, maintain your own Web site and/or e-Store, and ensure your customers and potential customers can find what they are looking for.

NETWORK ADMINISTRATION

Need help with your Local Area Network (LAN)? Perhaps you lost your LAN administrator, or maybe you are just now discovering the need to connect your computers in a network.

Whatever your situation, the experts at TruVista can provide LAN administration for your business. Our technicians are Microsoft® and Cisco® certified. That means they have the premier certifications designating them as professionals who can analyze network requirements, and then design and implement network infrastructure based on the Windows® platform and Microsoft® Server software. And yes, implementation responsibilities do include installing configuring, and troubleshooting network systems.

Whether you are interested in a client-server network or a peer-to-peer network — or you don't know how to start — call TruVista. We can administer your LAN efficiently and for a reasonable cost.

WEB HOSTING

Want to get your own commercial Web site but don't have time to learn about the Internet business? Let us help! TruVista offers full-service Web site hosting. Simply design your Web site, and leave the rest to us!

We can even set up personalized e-mail accounts for your employees, such as "**John.Smith@yourcompany.com.**"

Our Web site hosting services include domain name registration and e-mail aliases. Additional services include anonymous FTP, CGI scripts, multiple e-mail accounts, and secure servers.

Our Web hosting services are fully scalable, so you can acquire more storage or capacity as needed.

Contact a Customer Service Representative to learn more.
